# Sanitized<sup>®</sup> products for the EU market are in compliance with BPR and REACH

Sanitized<sup>®</sup> products are very widely used on a great variety of materials. As responsible specialists for antimicrobial finishing with a broad spectrum of applications, we attach great importance to the safety of all Sanitized<sup>®</sup> products for man and environment.

SANITIZED AG confirms that Sanitized® products for the EU market fulfil the requirements of

- Regulation (EU) No 528/2012 (BPR, the Biocidal Products Regulation)
- Regulation (EC) No 1907/2006 (REACH).

#### **Compliance with the BPR regulation**

Sanitized<sup>®</sup> products for the EU market comply with the Regulation (EU) No 528/2012, the BPR and with the Commission's decisions concerning the non-inclusion of substances.

#### Compliance with the BPR list article 95

All active substances used in Sanitized<sup>®</sup> products for the EU market are from legal sources according to the list related to article 95 of the BPR.

#### **Compliance with the REACH regulation**

Active substances, exclusively produced or imported for use in biocides are considered registered according to article 15 paragraph 2 of the REACH regulation concerning chemical substances, therefore all of the Sanitized<sup>®</sup> products under the scope of biocides are in compliance with the BPR. Furthermore, all other products and chemicals used in formulations for the EU market are in compliance with REACH.

#### No SVHC

Regulation (EC) No 1907/2006, the REACH Regulation, defines Substances of Very High Concern (SVHC) in Article 57. SANITIZED AG confirms herewith that all Sanitized<sup>®</sup> products do not contain SVHC as published by ECHA up to 16.01.2020 (Press Release).

Swiss antimicrobial expertise since 1935

CH-Burgdorf, 16.04.2020

# Sanitized<sup>®</sup> BC A 21-41, Sanitized<sup>®</sup> BC A 21-61, Sanitized<sup>®</sup> BC A 21-72 and Sanitized<sup>®</sup> MB E 99-58 do not contain nano-particles

Sanitized<sup>®</sup> products are very widely used on a great variety of materials. As responsible specialists for antimicrobial finishing with a broad spectrum of applications, we attach great importance to the safety of all Sanitized<sup>®</sup> products for man and environment.

# No nanotechnology and no nanoparticles

The Sanitized<sup>®</sup> products Sanitized<sup>®</sup> BC A 21-41, Sanitized<sup>®</sup> BC A 21-61, Sanitized<sup>®</sup> BC A 21-72 and Sanitized<sup>®</sup> MB E 99-58 are not based on nanotechnology and do not contain nano-particles. Test results confirmed that the particle size in these Sanitized<sup>®</sup> products are out of the nano range and therefore **are no nanoparticles**.

# General

Particles below 100 nanometers are considered as nano-particles. A nanometer is a millionth of a millimeter. Nanotechnology is a generic term for a large range of technologies dealing with structures and processes within the nanometer scale.

This information is based on our knowledge of this product at the time of publication. It is the responsibility of the user to assess his final product and to ensure the compliance with according regulations.
